

SLIME WEEK

Monday

Activity: The Science of Slime

Tuesday

Field Trip: Slime Kitchen

Wednesday

Activity: Slime Galaxy Jars

Thursday

Activity: Blowing Slime Bubbles

Friday

Activity: Editable slime

About Slime Week Week

During Slime Week, kids will become little scientists, diving into the fascinating world of slime! They'll explore the question: Is slime a solid or a liquid? Through hands-on experiments, they'll learn about the unique properties of slime and its chemical structures while whipping up their own gooey creations at home.

The fun doesn't stop there! An exciting field trip to a Slime Kitchen awaits, where the children will have the chance to make even more types of slime. From bubbly concoctions that pop and fizz to edible varieties that can be safely consumed, and even glow-in-the-dark slime that lights up the night, every day will be filled with creativity and discovery. Get ready for a week of sticky, slimy fun!

1- Monday

Today, we're exploring the fun world of slime! This engaging substance has unique chemical properties and various methods. We are going to embrace our inner scientists!

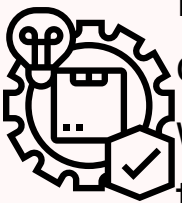

We will get creative with different slime recipes, experiment with colors and textures, and document our findings. Enjoy the process of exploration, young scientists!

2-Tuesday

We are excited to visit the SLIME KITCHEN, where we'll dive into a fun and sticky slime experience! During our time there, we'll explore the chemical properties of slime and discover various materials that can be added to it. Everyone will leave with their very own slime creation!

3-Wednesday

Imagine embarking on a cosmic journey right in your own home! Today, we're diving into the enchanting world of galaxy jars, where colorful slime swirls together to create a mesmerizing universe. It's not just a fun experiment; it's a celebration of science and art, a bonding experience that fosters exploration and wonder. Unleash your creativity, and let the galaxy shine bright on your shelf!

4-Thursday

What kid can resist the magic of bubbles? Well, today we're cranking up the fun by making bubbly buddies out of slime! Kids will unleash their inner slime-ologists and whip up some bubbly creations made entirely of gooey goodness!

5-Friday

Let's wrap up our week with some seriously fun slime-making! The kids will transform into slime-ologists as they dive into the kitchen, mixing up a batch of edible slime that's not just stretchy but also tasty! With a rainbow of flavors to choose from, they'll blend and create their own unique concoctions. Imagine the excitement as they experiment with fruity flavors like strawberry, blueberry, and even zesty lemon! Plus, they can add colorful sprinkles or edible glitter for a fun twist. It's going to be a delightful, hands-on experience that combines creativity and a little bit of science—perfect for a week of fun!
